Release 0.1.0

Mehdy Khoshnoody

Aug 10, 2021

Contents

1	Quickstart	1
1.1	Installation	1

CHAPTER 1

Quickstart

Pyeez is great powerful python package for creating console applications like *top*. it's simple and super easy to use. for example:

```
import datetime

from pyeez import Pyeez

app = Pyeez(__name__)

@app.window('clock', (5, 5), (20, 7), refresh_rate=1)
def clock(w):
    w.echo('{}'.format(datetime.datetime.now().strftime('%T')))

if __name__ == '__main__':
    app.run()
```

Installation and running:

```
$ pip install pyeez
$ python app.py
```

contents:

1.1 Installation

Just make sure you've installed python and pip properly and install it via pip:

```
$ pip install -U pyeez
```
